

Dochter met fragile x syndroom en prader willi

Symptoms that become more apparent as children grow may include:

- Lethargy (tiredness).
- Poor feeding ability.
- Weak muscle tone.

- Almond-shaped eyes.
- A long, narrow head.
- A triangular mouth.
- Short height.
- Small hands and feet.
- Underdeveloped genitals.

Wij hebben een dochter met een serieuze afwijking echter nog te weinig rond bekend we willen ze volwaardig leven gunnen
